1960 [15]p. 13 refs. N R L Trans. no. 823.
Order from LC or SLA mi\$2.40, ph\$3.30 61-13847

Trans. of Sudostroyeniye (USSR) 1959 [v. 25] no. 3,
p. 38-42.

Protection against corrosion of unballasted or rarely
ballasted cargo tanks of oil-carrying vessels can be
achieved by means of an over-all or local painting with
stable anti-corrosive paints. The highest stability under
practical conditions of tankers is shown by the coating
with an epoxide resin base. Elimination of steaming and
by lowering the temperature and jet pressure of a wash-
ing solution in the cleaning process of a painted tank
should considerably increase the lifetime of a protective
coating. (Author)
